Full-time

CONTRACT TYPE
Permanent

WORKING AREA
Research & Development

REFERENCE CODE
EN59195314_ONLE_4

RESPONSIBILITIES

- As an integral part of our synthetic research departments, you will propel the research and development of basic chemicals and intermediates forward.
- o Along with searching for new products, a strong focus will be placed on developing new processes and procedures as well as optimizing established ones for a variety of applications.
 - o You will work on multi-step organic syntheses from initial screening in the laboratory up to scale production.
 - o An integral part of your work will be the evaluation of analytical methods as well as the documentation and presentation of the results of your research.
 - o You will work in close contact with internal partners in R&D, Production and Marketing as well as collaborate on projects with universities and external research institutes.
 - o While accomplishing your tasks, you will also continue to develop your entrepreneurial and personal skills.

BENEFITS

- o Flexible work arrangements so that you can balance your working life and private life.
- o Onboarding to help you settle in quickly, ensuring you are part of the BASF team from day one.
- o An attractive competitive salary that is based on the company's success and your individual performance.
- o Development discussions and programs so that you can reach your full potential.
- o A secure work environment because your health, safety and wellbeing is always our top priority.
- o Health and wellbeing programs to help you achieve better health and work-life balance.
